# Simplify Your Access to Structural Connector Information

# MiTek®
# SPECIFIER™

Quickly look up connector capacities and images, view code evaluation reports, and map products to MiTek structural connectors. This free, versatile tool assists with the design, specification, and quoting processes for steel connections in wood frame structures of all sizes.

## DESIGNED FOR ENGINEERS AND ESTIMATORS

## BENEFITS

→ Find the right product based on specific application, member details, loads, and other design criteria.

→ Identify the right product using advanced filtering, sorting, and search functions.

→ Compare up to 4 products side-by-side: by allowable load, code evaluation, and fastener schedule.

→ Easy-to-use, visual tool featuring high-resolution product images.

→ Create reports to help with quoting, sales, and supply needs.

→ Generate catalog pages for each specified product, including product notes and application information.

→ Available on desktop, web, and mobile.

**Download the free software now.**
