

Cubit Offers Fast Estimates to Multi-State Contractor Without Time-Consuming Setup

Contractor Ron Richardson Can Take Off Multiple
Items with One Trace of a 2D plan or 3D BIM Model

“I especially like how I can takeoff multiple items at once. Cubit support and training has been great.”

RON RICHARDSON, OWNER OF BJ CONSTRUCTION

In the Plant City, FL area, along the corridor between Tampa and Orlando, Ron Richardson, owner of BJ Construction II, has his hands full with a wealth of projects. The reason he’s so busy? He manages construction project of all kinds – custom homes, affordable housing, and commercial projects – reaching all over Florida, and as far away as New Orleans.

Clearly, one road to sure success in Richardson’s construction business – no matter what type of project you are working on – is to accurately estimate your materials. Estimate too high, and you have overage, returns, damage, and waste. Estimate too low cost and you risk a reduced profit (or even a loss) on the job, to say nothing of time lost to wrangle missing materials.

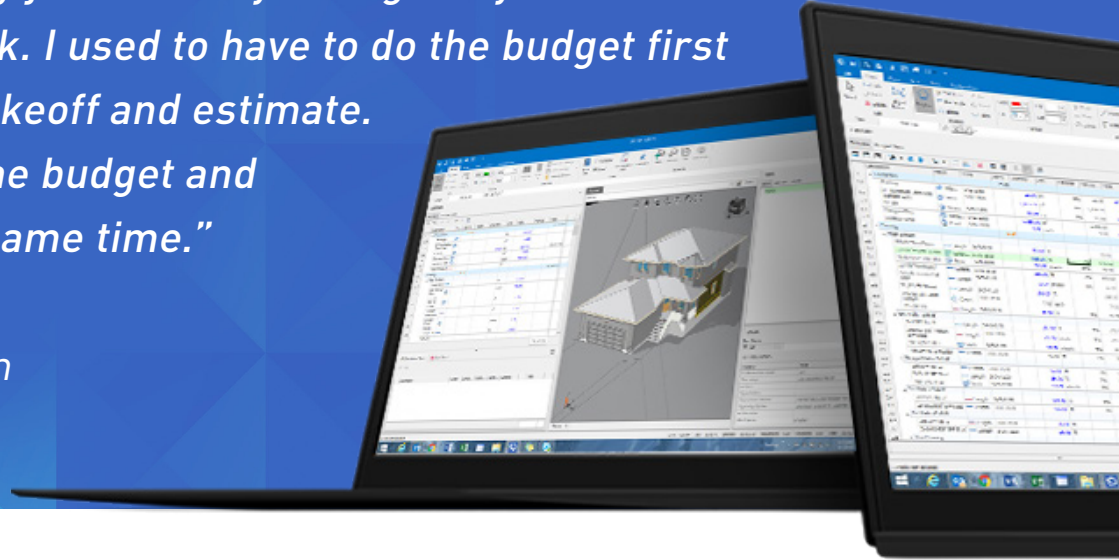

| CUBIT STEPS IN

Ron Richardson has brought in MiTek's Cubit to estimate his jobs. "Cubit is far more detailed and flexible than other estimating systems I've worked with," Richardson said.

"It allows me to estimate multiple items in a single takeoff, and we can build assemblies, which we put in a library. From there, I can extract a bill of materials, itemize my materials, and determine accurate quantities. My previous estimation software didn't allow me to do many of the functions I can run in Cubit."

"Cubit made my job easier by taking away lots of redundant work. I used to have to do the budget first and then the takeoff and estimate. Now I can do the budget and takeoff at the same time."

Ron Richardson

WHY CUBIT?

SPEED: With Cubit, Richardson is able to take-off multiple items with one trace of a 2D plan or 3D BIM model, so estimating time is dramatically reduced.

ACCURACY: By tracing directly over imported plans, Richardson's quantity takeoffs of any complexity are performed accurately ...and fast.

CONSISTENCY: Richardson can use template price lists and past jobs as the source for new estimates.

EFFICIENCY: Revisions to plans can be overlaid on an existing plan Richardson has already taken off, so his team can update estimates based just on changes to the plan.

SIMPLICITY: Set up does not require creating formulas. Cubit can be up and estimating in just hours.

SPECIAL FEATURE:

- Estimating and takeoff are combined in one seamless process.
- Job analysis: Group similar information together to increase visibility and comparison of multiple jobs.

ESTIMATING:

- ✓ Integrated Estimating
- ✓ Calculation Sheets
- ✓ Rate Sheets
- ✓ Price Lists
- ✓ Job Manager
- ✓ Cost Management
- ✓ Job / Price Update
- ✓ Code Grouping Column
- ✓ Multiple estimate configurations
- ✓ Rel column
- ✓ Job Merge (Multi-user solution)
- ✓ Job Options Management
- ✓ Subcontractor Comparison Program

TAKEOFF:

- ✓ On Screen Takeoff
- ✓ BIM Takeoff
- ✓ Import PDF, CAD, BIM, Image files
- ✓ 3D Visualization
- ✓ Automatic Plan Revisions
- ✓ Detailed Opening Takeoff
- ✓ Variations Management
- ✓ Shape Color Modes

BIM:

- ✓ BIM Reader

INTEGRATIONS:

- ✓ Microsoft Excel
- ✓ Global / Offsider
- ✓ Mudshark
- ✓ Xero
- ✓ BuilderTREND
- ✓ Cordell Direct

REPORTING:

- ✓ Standard reports
- ✓ Parametric / customizable reporting
- ✓ Custom Report Builder
- ✓ Bill of Quantities

ABOUT CUBIT

Cubit has been pioneering estimating and takeoff software for over 30 years. Their ethos is built around making construction easier - working extremely hard with industry and tertiary partners around the world to ensure they produce powerful, user-friendly estimating software.

Every facet of Cubit operates ensures they have the customer at the front of their mind. This includes the development process, which strives to include customer's ideas. It's why tens of thousands of industry professionals worldwide trust Cubit estimating and takeoff solution.
