THE NEW STANDARD

# THE NEW STANDARD IN MULTI-USE ADHESIVES

Our line of Anchoring Solutions offers the right formula for any job!

## ■ CIA-EA Uncracked Concrete Epoxy Acrylate

High strength, fast cure structural adhesive for anchoring threaded rod and deformed rebar into uncracked concrete.

Code Evaluation Report: IAPMO ES ER-311

## ■ CIA-GEL 7000-C Cracked Concrete Epoxy

Attach anchor rods into concrete that may become cracked due to cyclic loading from earthquakes or wind.

Code Evaluation Report: IAPMO ES ER-473

## ■ CIA-GEL 7000 Masonry Epoxy

Specifically designed to attach anchor rods into fully grouted concrete masonry units. Evaluated for seismic, sustained load, elevated temperature and freeze-thaw suitability conditions.

Code Evaluation Report: ICC ES ESR-1702

## ■ CIA-GEL 6000-GP

Superior epoxy for general purpose structural applications that require quick load times and for doweling applications requiring state DOT approval.

Numerous DOT Approvals
