

TRUSS STRUCTURAL WOOD SCREW

FOR STUD-TO-PLATE & PLATE-TO-TRUSS CONNECTIONS

MiTek® PRO
SERIES

The MiTek® Pro Series™ WSTS Truss Structural Wood Screw can be used to resist uplift and lateral loads for truss/rafter-to-plate and stud-to-plate connections. The WSTS is tested in accordance with ICC-ES AC233 and AC13 and meets 2018 IRC and IBC code requirements.

- ➔ Reverse thread angle on opposite ends of screw creates increased withdrawal where it's needed for higher capacity and greater uplift resistance
- ➔ The shank is fully threaded along its length for installation flexibility
- ➔ Head design countersinks out of the way of finishing materials like drywall and trim
- ➔ Type-17 point engages the wood quickly for easier starting and driving the screw
- ➔ Included 6" T30 Driver and Angle Tool makes proper installations easier
- ➔ WSTS can be installed on the inside of the wall eliminating difficult installations on the outside
- ➔ Included driver bit with angle tool holds screw firmly so screw may be installed with one hand
- ➔ Code Reports: IBC, FL, LA

- 1) EXT = Exterior Coat.
 - 2) Allowable loads have been increased 60% for wind or seismic loads; no further increase shall be permitted.
 - 3) Allowable loads are for WSTS screws installed in accordance with installation instructions.
 - 4) When the screw is to be loaded in multiple directions simultaneously, refer to note 1 in Design Notes on page 20 of the 59th Ed. MiTek catalog.
 - 5) Double top plates must be fastened together as required by applicable code.
 - 6) F1 loading is parallel to the top or bottom plate. F2 is loading perpendicular to the top or bottom plate.
 - 7) Designer must ensure that a continuous load path transfers the uplift loads to the foundation.
 - 8) Wood species shall have a minimum NDS referenced specific gravity of 0.50 for DF, 0.55 for SP, and 0.42 for SPF.
 - 9) Table loads do not apply to installations in trusses with end grain bearing.
- Refer to MiTek's WSTS Truss and Wall Tiedown Installations technical bulletin at MiTek-US.com for additional design information.

INCLUDED IN EACH BOX:

- 6" T30 Impact-Driver Compatible Bit
- Angle Tool
