# Real-Time Production & Delivery Tracking in a Single Platform

UPGRADE NOW

MiTek®
PRODUCTION

Boost your truss and wall production with the most integrated and streamlined production system for accurately managing component production throughout your plant.

BENEFITS

→ Streamline your workflows through automation of repetitive tasks, personnel notifications, and smooth transitions between production phases.

→ Enhance operations with real-time plant and team monitoring, performance tracking, and goal setting.

→ Move to a paper-free environment by storing job records digitally, significantly reducing the need for physical storage.

→ Simplify prioritization by managing start dates, selecting appropriate lines of equipment, and determining product ship dates.

BUILD SPECS ARE VISIBLE DURING ASSEMBLY

MiTek®

Upgrade from MiTek® ShopNet or MiTek® Virtual Plant (MVP) to MiTek® Production for even more benefits.

→ Integrate your workflows seamlessly with the complete MiTek Software Suite, including MiTek® Structure and MiTek® Management™.

→ A browser-based solution that supports unlimited users, ensuring one upgrade applies to all workstations.

→ Utilize a variety of standard reports or work with the MiTek team to create your own.

→ Manage roofs, floors, and walls all within the same software application.

→ Dimensions are available on-demand, so you can confirm truss or wall panel specs at any point during the assembly process.

→ A consistent and customizable user interface across all workstations, simplifying training and operation for team members.

→ Includes quarterly product enhancements and consistent version updates to keep your software and facility on the cutting-edge.

The conversion process typically takes around two weeks to complete for MiTek ShopNet or MiTek MVP users.

Pre-Launch

SOFTWARE DEMONSTRATION
- Receive a virtual demonstration of MiTek Production to preview its software capabilities
- Review next steps and expectations for the upgrade process

INTAKE FORM
- Fill out the intake form to describe your current processes and equipment
- Engage in a detailed discussion with the MiTek implementation team so they fully understand your workflows and the requirements of your upgrade

GAP ANALYSIS
- MiTek team evaluates your current software to ensure it's fully equipped for seamless deployment

Launch

REMOTE DEPLOYMENT
- MiTek Production software is installed remotely on your system by the MiTek implementation team

ON-SITE TRAINING
- MiTek works with you to finalize the installation settings, ensuring any additional setup tasks are completed as necessary
- MiTek provides training for your employees

Contact your MiTek Representative to get started.
